COMMUNITY IMPACT

Hackensack Public Schools Go Solar

Seven facilities in the Hackensack School District have a combined 1.6 MW of solar installed on school properties. The district intends to reinvest the long term cost savings from these installations directly into classrooms.

Brick Township Schools Install Solar Carports

Through an agreement with a private solar company, cars on the campuses of Brick Township schools are now receiving shade while the school district gets paid. At a rate of \$18,000 per MW generated, the district estimates it will rake in an additional \$200,000 in annual income.
